

# WeTest

Professional Network Testing  
Accessible to Everyone

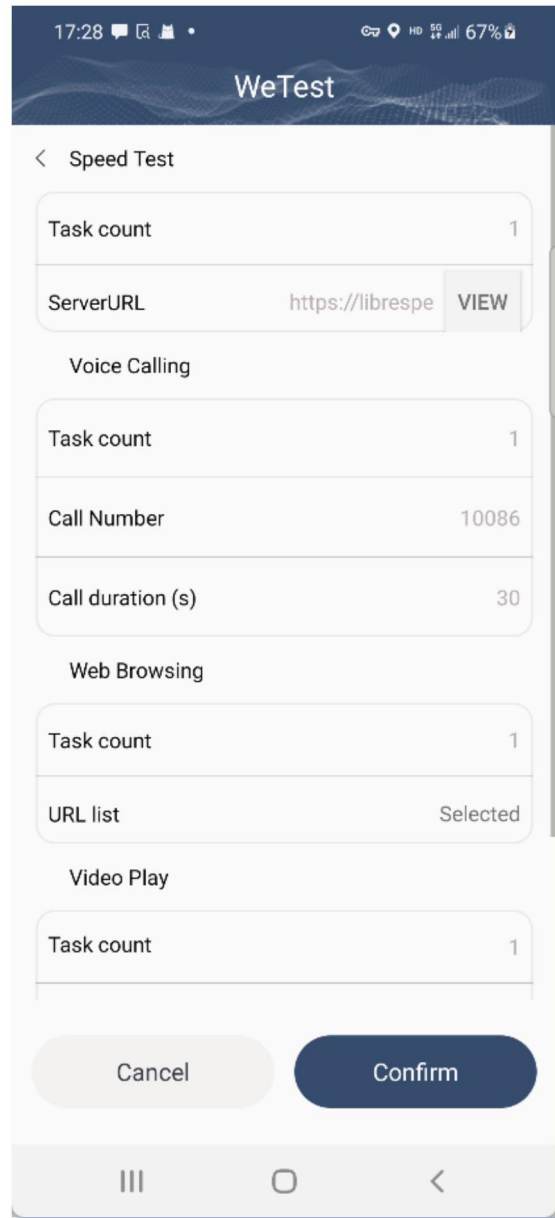

# 1 Scoring Test

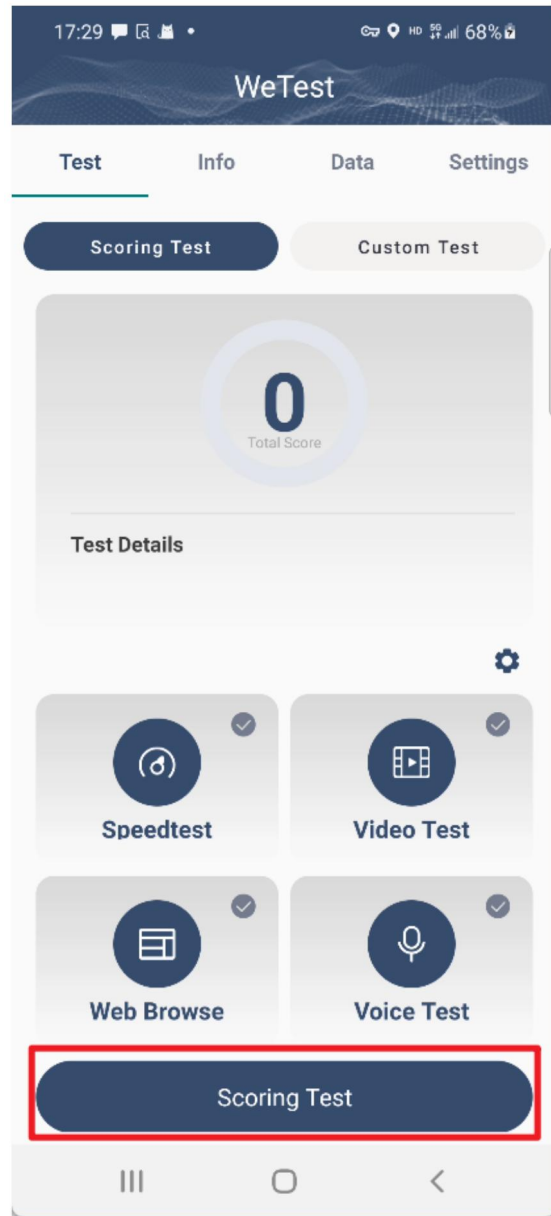

You can select one or multiple test items.

Click the settings icon to configure the test content for these four items, such as the phone number to dial or the YouTube video URL.

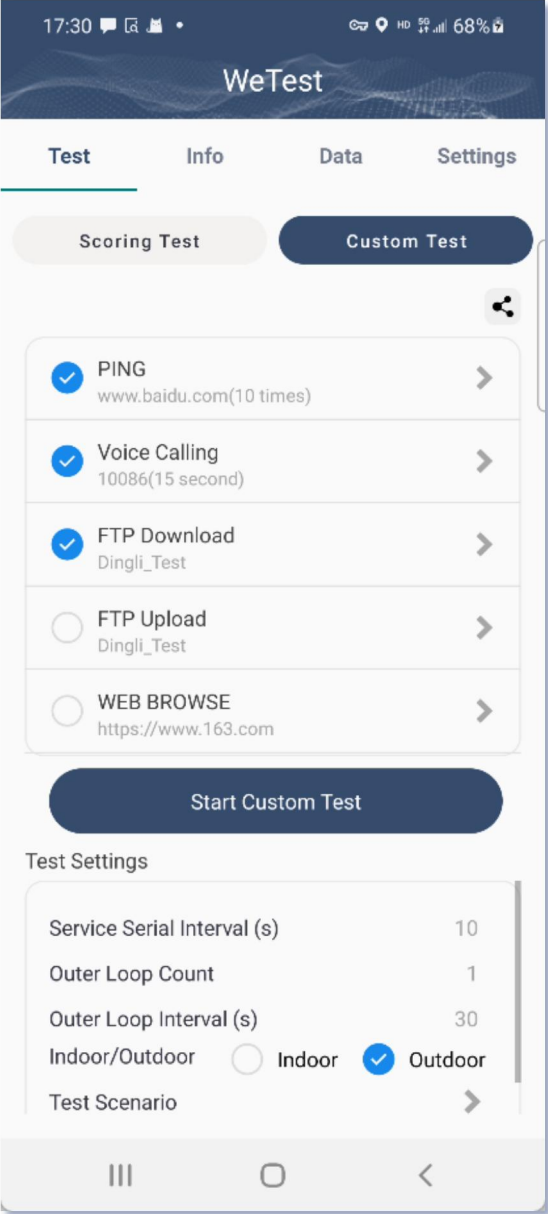

After selecting your test items, click **Scoring Test**.

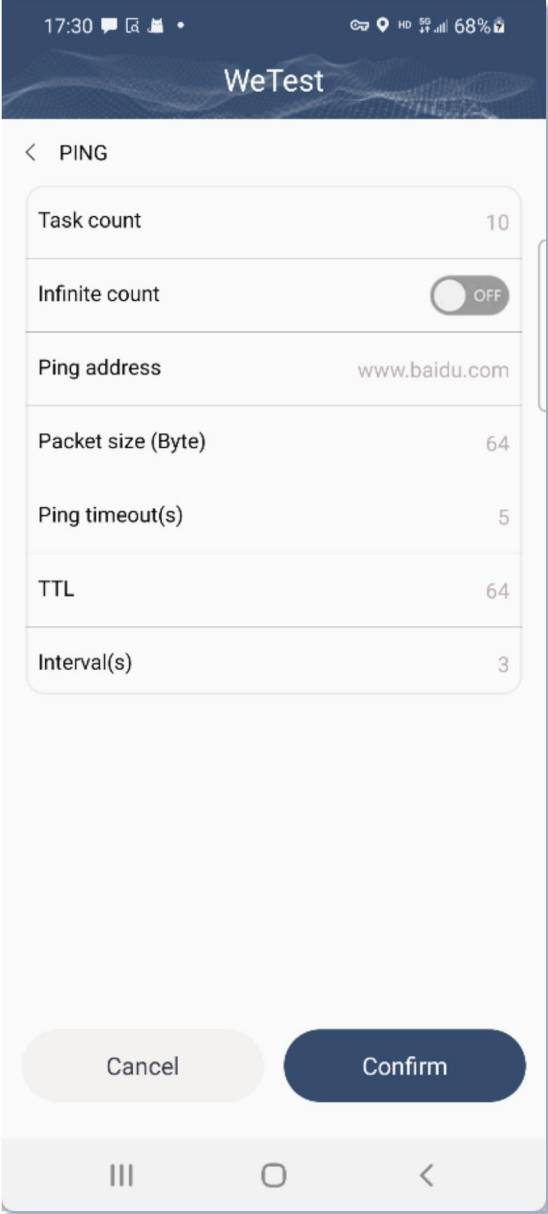

The results of the Score Test are not saved.  
Therefore, they cannot be used for data analysis or playback.

# 2 Custom Test

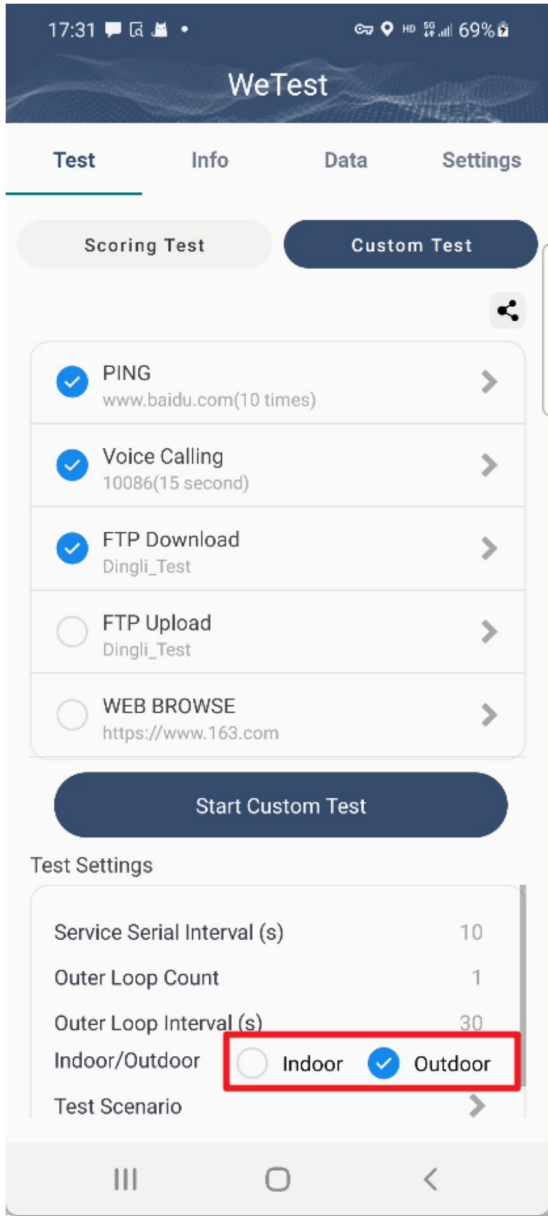

You can select one or multiple test items.

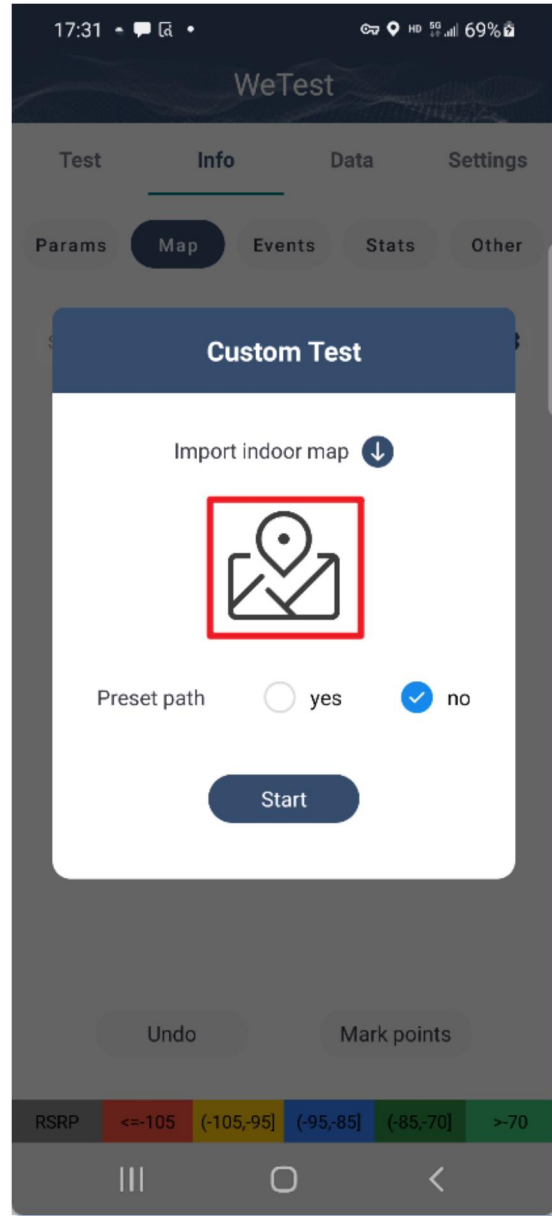

You can click on each test item to configure its settings.

Before starting the test, select either **Indoor** or **Outdoor**.

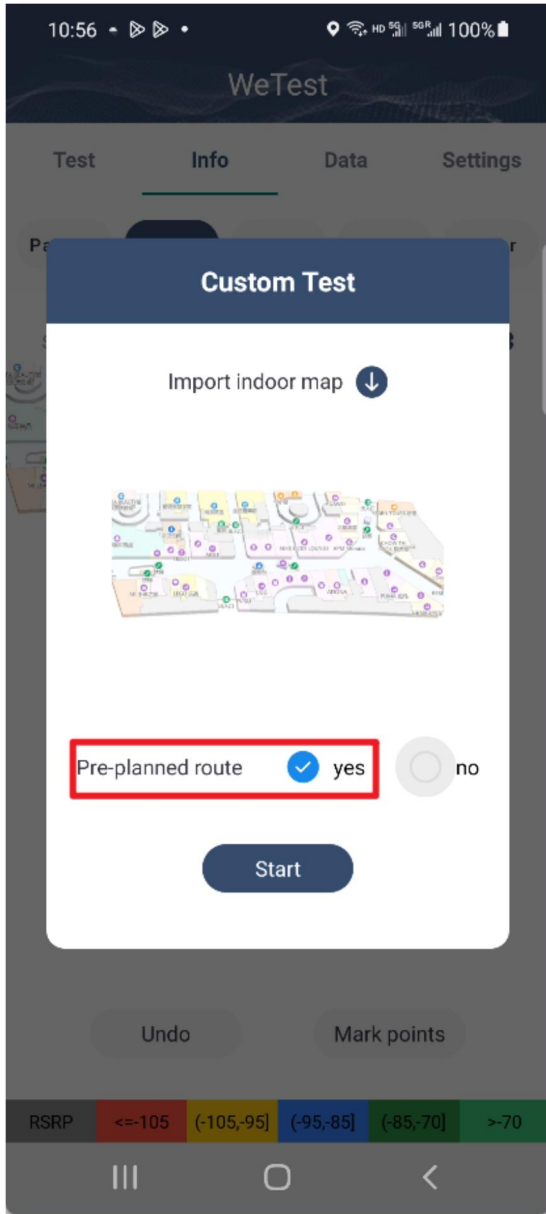

For indoor testing, you need to import an indoor map.

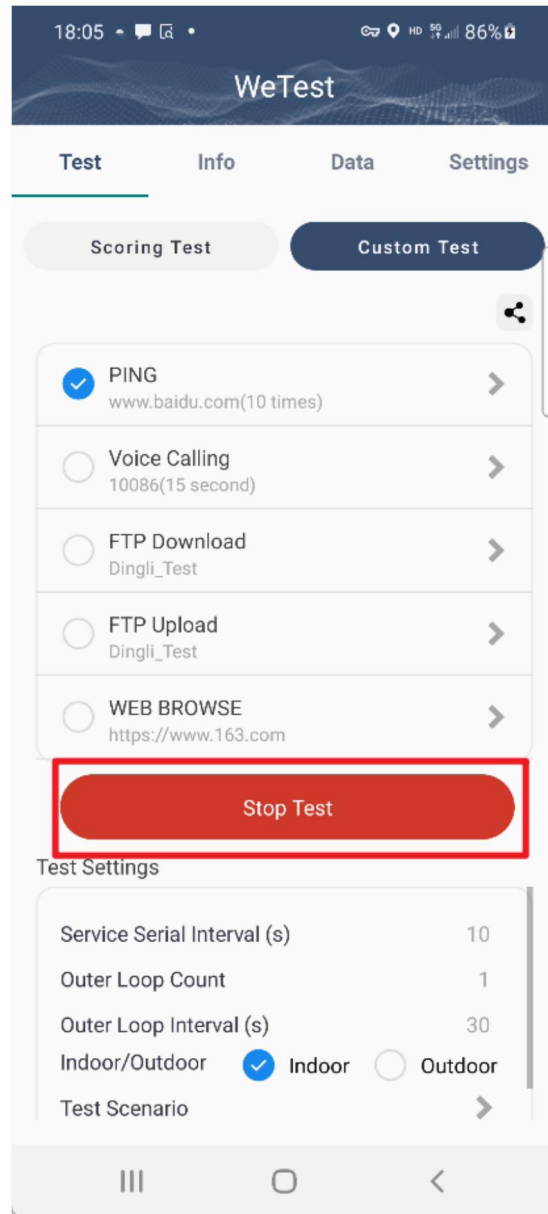

Then perform manual pin-drop localization.

Indoor testing also supports **pre-planned route**.  
Before a test, you can pre-plan your walking route.  
During the test, simply click **Make \*\* Point** to log your position.

Click **Stop Test** to end the current test.

Data from a custom test can be viewed in the data list, and supports data export and statistics.

## 3 Statistics and Export

From the **Data** page, you can select the relevant data to view statistics or export it to a **.rcu** format. Raw data can be analyzed and played back using Dingli's Pioneer Expert software.

## 4 Settings

From the **Settings** page, you can configure the FTP server, as well as set thresholds and colors for various parameters..

## 5 Upgrade to Subscription

Custom tests, data export, and statistics are all paid features. Please upgrade to a subscription to unlock these functions.

## About Dingli

Founded in 1998, Dingli is a global leader in network lifecycle testing, measurement, and optimization solutions. Headquartered in Zhuhai, China, we are dedicated to enhancing wireless network performance for communication service providers and enterprises.

## Our Vision

To lead in global wireless network testing and optimization through continuous innovation and comprehensive solutions. Leveraging our expertise in China's 5G development, we empower communication service providers to optimize, modernize, and monetize their technologies, ensuring seamless connectivity for a smarter, more connected world.

At Dingli, we're committed to driving technological advancements in the 5G era, providing cutting-edge solutions that ensure our clients stay ahead in the fast-evolving landscape of wireless communication.
